 - Utilized advanced analytical tools to measure campaign performance and identify areas for improvement, ensuring data accuracy and integrity.

Projects

BigBasket(Clone) [Live Demo Link](#) [Github Repo Link](#)

HTML5 CSS3 Javascript(es6)

- Developed an online shopping application named "BigBasket" to offer users a convenient platform for browsing and purchasing products online.
- Managed the complete order placement system, including Create, Read, Update, and Delete (CRUD) operations for orders.
- Utilized JavaScript, HTML, CSS, and ES6 to build the application, delivering a responsive and user-friendly interface.
- Implemented robust user registration and authentication functionalities to ensure secure access to the platform.
- Designed and integrated product browsing and cart functionalities, enabling users to explore and manage their selections effortlessly.

Hillstation Adventure [Live Demo Link](#) [Github Repo Link](#)

HTML CSS JavaScript(es6) React API's

- Created an immersive web application, 'Hillstation Adventure,' that invites users to embark on thrilling journeys to picturesque hill stations.
- Implemented robust user registration and authentication features to ensure secure access.
- Developed a seamless trip and room booking system, allowing users to plan and book their trips and accommodations with ease.
- Designed and built the front-end using HTML, CSS, JavaScript, and React, providing an engaging and user-friendly interface.
- Managed the project's source code and version control using GitHub, ensuring collaborative development and easy maintenance.
- Completed this individual project within a tight deadline of 5 days.
